LED Technology

With a wide experience in using LEDs for indoor light fixtures, Artemide exploits LED technological innovation also for outdoor light fixtures, combining values which cannot be omitted, such as light distribution control, light fixture efficiency, reduced energy consumption and operation costs. Economic and environmental advantages deriving from using LEDs are:

- high light efficiency
- low consumption
- reduced CO₂ emissions
- very reduced material use
- use of non-toxic and non-harmful materials
- reduced size and weight thus ensuring great savings for transport and logistics
- use of components that can be easily disassembled and recycled
- use in safety low voltage
- very long operation time
- short maintenance cycles
- excellent shock and vibration resistance

Artemide's expertise in the field of LED lighting fixtures focuses on some points which are absolutely necessary for a correct and long-lasting use of this technology:

- The accurate selection of last-generation Leds
- The design of heat dissipation systems
- The use of advanced electronic components
- The development of excellent optical system

Manufacturing

The care for sustainability of Artemide – a Company certified ISO 9001:2008, ISO 17025 and WMT – is ensured both by its French plant Megalit, accredited with ISO 14001 and implementing the Carbon Footprint, and by its focus on product lifecycle (LCA), i.e. design, choice of raw materials, processing to minimize transportation, and down to assembly, packaging, and disposal.

The improvement of the light fixture efficiency during use involves Energy-saving, reliability and lastingness of the implemented technical solutions with a consequent reduction of CO₂ emissions.

All Artemide light fixtures comply with European Directives and Standards and bear CE mark.

ISO 9001:2008

ISO 17025

ISO 14001:2004

WMT

LCA (Life Cycle Assessment)

LCA is a strategic approach used to assess the potential environment impact that a product has during all the stages of its life cycle: selection of raw materials, processing, transport and assembly, packaging, distribution, use phase, disposal and recycling.

The responsible light

Artemide's research activity is constantly committed to developing and adopting lighting systems that pursue the objective of maximum energy efficiency.

All project choices focus on a sole objective: to improve people's quality of life and their relationship with the environment. In the sphere of a policy of the reduction of energy consumption and being ahead of the regulatory requirements, there are four areas of action into which Artemide's commitment is specifically translated:

Eco-Effectiveness

Maximum attention is devoted to design and production process: responsible use of resources, meticulous choice of processes and technologies with a view to achieving an energy balance.

Long term

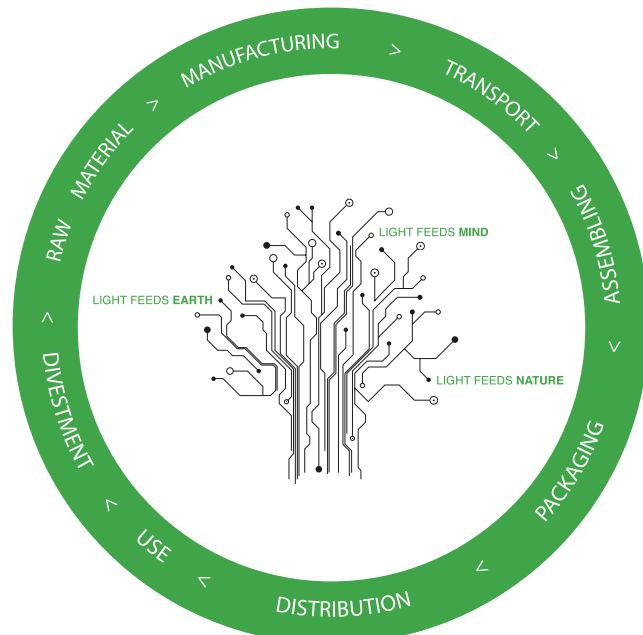

Designing for the long term through careful planning of the entire life cycle of the product, promoting internal technical training using the experience accrued in the research into sustainability (LCA, analysis of technologies, of processes, etc.) developed with university research centres.

Responsible Consumption

To spread culture and offer instruments for a suitable choice (TCO, LENI) and a rational use of light, judging it in terms of energy saving and affordability.

Quality

Quality is a fundamental choice for a more lasting relationship with the product and as a prerequisite in the search for authentic environmental innovation.

Artemide Outdoor

Outdoor materials and finishes

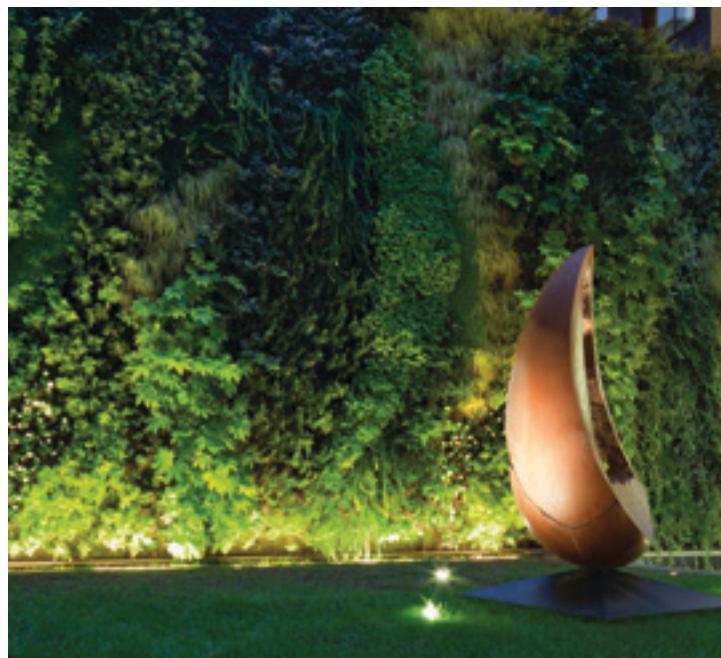

The Outdoor fixture design process includes accurate material and technology selection so that fixtures meet all the technical, aesthetic and functional requirements. All Artemide products have undergone the following tests:

- Saline fog tests to evaluate corrosion resistance;
- UV radiation exposure tests to evaluate their behaviour when exposed to sunlight;
- IP tests to evaluate the fixture waterproofing;
- IK tests to evaluate shock resistance;
- Load tests for walk-over and drive-over built-in fixtures.

The painting process is very important. The surface treatment of an outdoor lighting fixture exposed to extreme atmospheric agents and diverse weather conditions must ensure a suitable level of protection against the aggressive action of acid rains, saline environments, humidity and UV radiations. With its own internal painting plant, the surface treatment of the Artemide outdoor range is in full compliance with RoHS RAEE standards and qualitative conditions are constantly observed.

The painting plant cycle is provided with a pre-treatment tunnel that includes 6 stages of iron phosphate treatment and a rinse process together with a nanotechnological spray passivation process, consisting in the deposit of diamond structured molecules. This is useful to prepare the fixture for the application of the anti-corrosion epoxy powder primer through an electrostatic application system with dedicated spray cabins. Once the polymerization has been completed through the dry oven, the powder paint finish with a polyester-free base is applied. Of course this application is carried out after the dry oven and reticulation at 190 degrees.

Private Residence, Milan - IT, Project: Erna Corbetta

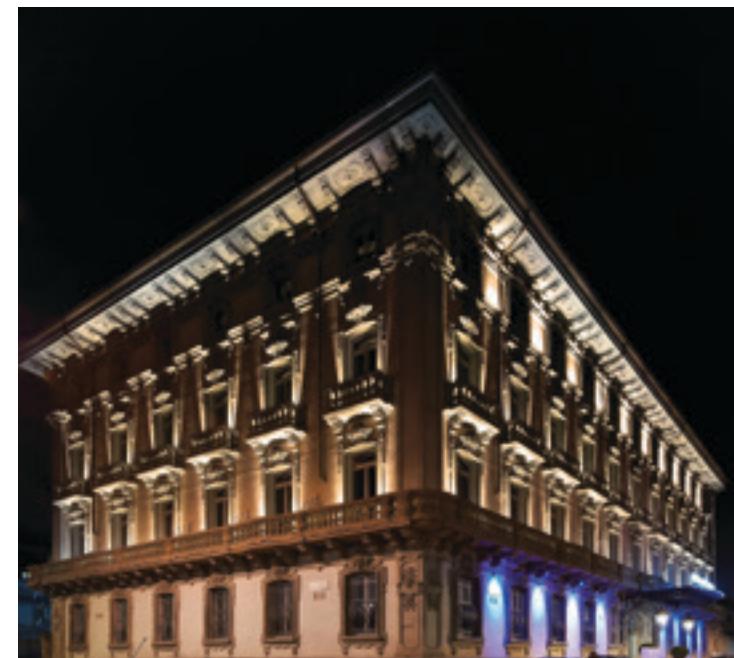

Fields of application

The Artemide Outdoor collection is suitable for different applications:

- scenic lighting for enhancing façades and architectural elements;
- functional lighting of paths, bikeways, parks;
- social space lighting for urban landscapes, squares and gathering places;
- environmental lighting, respecting the nature of parks and gardens;
- indoor lighting in places where water requires fixtures with high IP value, such as wellness centres and swimming pools.

Chateau Monfort, Milan - IT, Project: Federico Vedani

Service

The Lighting Engineering Project

Artemide develops lighting solutions that integrate architectural and living spaces, always with a keen eye on sustainability, sharing expertise and knowledge with architects and lighting planners.

Artemide is sensitive not only to the needs of human beings, but also to the environment, offering a new service aimed at energy saving and to help in reducing costs.

This service is called Artemide TCO - Total Cost Ownership and it is one of the latest generation calculation tools. Beginning from precise estimates of installation and usage costs, it offers solutions for controlling equipment and installations that require a targeted consumption of energy.

With its 55 Lighting Consultancy Centres worldwide, Artemide offers customers a complete service to support lighting engineering plans, beginning a constant dialogue with its partners.

It is also possible to download the Dialux and Luxart calculation programs, Eulumdat data, 2D and 3D images of products from the artemide.com website, together with all the technical information necessary to implement your own independent lighting engineering project.

Catalogues

With 4 product lines, Artemide offers a complete range of lighting equipment. These can be integrated to resolve the lighting engineering needs with all types of application, both indoor and outdoor.

Customer service

Via the website and the dedicated telephone lines, Artemide guarantees a prompt customer care service both pre- and post-sale. Furthermore, by signing up for the newsletter it is possible to be constantly updated on new products, events and projects.

Collection of walk-over, drive over and downlight built-in fixtures, available in several sizes, with round or square shape and aluminium or steel frame or flush glass.

Mechanical solutions

The optimum sizing of the fixtures, which is obtained with FEM simulations, ensures resistance to load keeping small size.

The use of AISI 316L steel for the drive-over versions ensures the best resistance to corrosion even in aggressive environments, resistance to abrasion and to mechanical load.

The silicon aluminium alloy EN AB-44100 of the fixture body ensures optimum resistance to corrosion.

The tempered glass with ground corners is resistant to scratches and, in flush glass versions, ensures a continuous installation between fixtures and floor or ceiling.

The use of nylon reinforced with fibre glass for the recessing boxes ensures high resistance to loads and to the chemical aggression of soil.

Optical performances

The use of selected Leds and the accurate design of optics ensure:

- optimum control of the light beams with the use of metacrylate lenses;
- different kinds of beam opening;
- wide selection of binning;
- adjustable optic unit;
- high flows.

Energy consumption

The highly efficient, ENEC certified ballasts allow a minimum energy consumption without waste. The use of ballasts fully complying with electromagnetic emission standards avoids radiation dispersions.

Installation and maintenance

The installation through an external connector avoids fixture opening.

Easy assembly with just two screws for fastening to the recessing box for floor versions, springs and brackets for the ceiling versions.

Almost no maintenance required.

Design
Ernesto Gismondi
2011

- Light fixture with high-performance LED light sources.
 - Drive-over and walk-over recessed floor installation.
 - 5 sizes (55, 90, 150, 220, 320 mm).
 - Round and square version.
 - Composed by body, frame, black silkscreened tempered glass, recessing box.
 - Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable (H05RN-F 2x1 for versions 55 and 90, H05RN-F 3x1 for version 150, H07RN-F 3x1 for versions 220 and 320), resin-bonded inside the body.
 - Electronic ballast integrated in the body; for versions 90 and 55: 24V power supply and remote ballast supplied separately.
 - Frame in aluminium (Naiade 55 and 90 walk-over) or in stainless steel (Naiade 55, 90, 150, 220, 320 walk over - drive-over).
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to 13.5 mm.
 - Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
 - Glass surface temperature lower than 40°C.
 - Recessing box for laying in reinforced polymer, can be ordered separately.
 - Adjustable optics: PMMA lenses in 3 different versions of beams.
 - White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
 - Versions 150, 220 and 320: circuit operation is assured also in case of damage to one or several LEDs.
- Screws in AISI 316 stainless steel.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
 - Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
 - IP Rating IP65-IP67.
 - ENEC approved.
 - Versions 55 and 90: insulation class III.
 - Versions 150, 220 and 320: insulation class I.
 - Installation must be carried out by specialized personnel. Carefully follow the instructions.

Orcamo 150
Round

Orcamo 220
Round

Orcamo 230
Round

- Light fixture with high-performance LED light sources.
 - Walk-over recessed floor installation.
 - 3 sizes (150, 220, 320 mm).
 - Round and square version.
 - Composed by body, black silkscreened glass flush with the floor, recessing box.
 - Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable H07RN-F. Electronic ballast integrated in the body.
 - Power connection to the mains by means of the IP67 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to 13.5 mm.
 - Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
- Glass surface temperature lower than 40°C.
 - Recessing box for laying in reinforced polymer to be ordered separately.
 - Adjustable optics. PMMA lenses in 3 different versions of beams.
 - White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
 - Circuit operation is assured also in case of damage to one or several LEDs.
 - Screws in AISI 316 stainless steel.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
 - IP Rating IP65-IP67.
 - ENEC approved.
 - Insulation class I.
 - Installation must be carried out by specialized personnel. Carefully follow the instructions.

T409910 Recessing box

With an height of just 6cm, Ego minimizes the space of the floor recess.
Separate ballast.

FLAT

- Light fixture with high-performance LED light sources.
- Recessed floor installation.
- Walk-over version.
- Low recessed depth (60 mm).
- 4 sizes (55, 90, 150, 220 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass, recessing box.
- Body in EN AB44100 aluminium, silicone gaskets; Feeding cable Ho05RN-F, with 300cm length for EGO 55 & EGO 90, 20cm for EGO 150, 30cm for EGO 220.
- Frame in painted aluminium or stainless steel.
- Power connection to the mains by means of remote ballast.
- Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
- Glass surface temperature lower than 40°C.

- Recessing box for laying in reinforced polymer, can be ordered separately.
- Fixed optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- Insulation class III.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

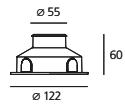

Wall Washer optic

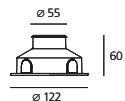

Elliptical distribution of the luminous flow suitable for wall washer effect.

Ego vetro 220
Round

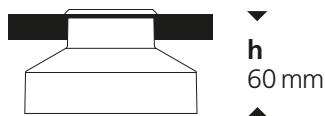

Ego vetro 220
Square

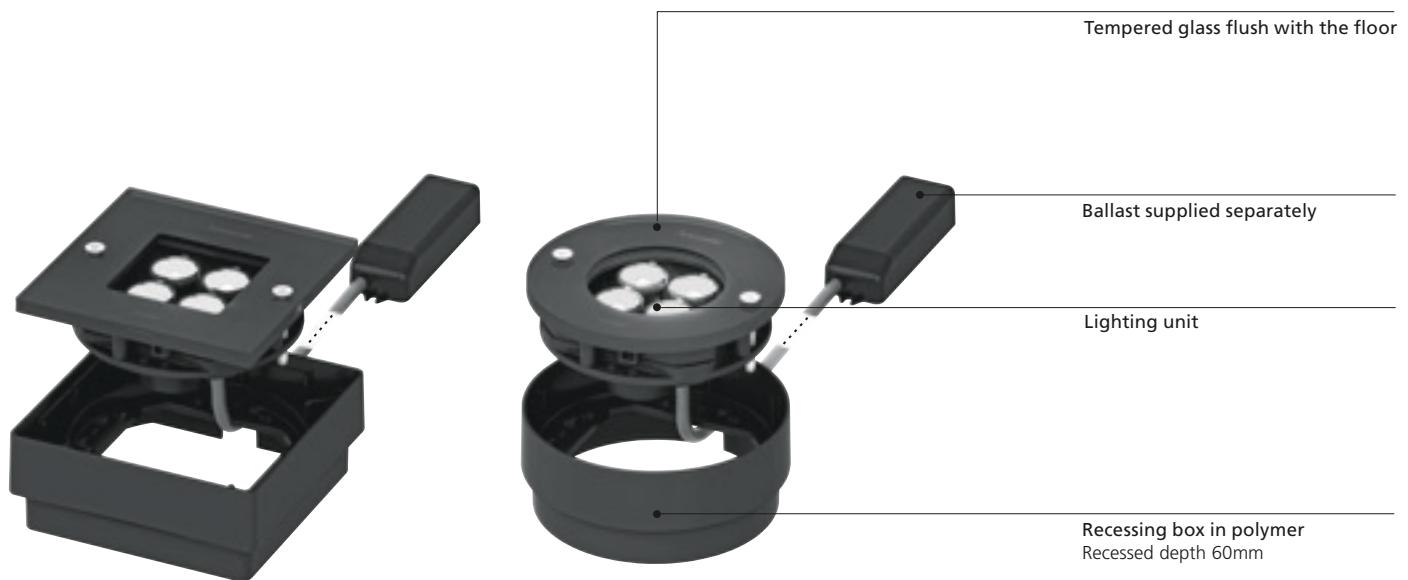

Ego vetro 150
Square

With an height of just 6cm, Ego vetro minimizes the space of the floor recess.
Separate ballast.

FLAT

- Light fixture with high-performance LED light sources.
- Walk-over recessed floor installation with low recessed depth (60 mm).
- 2 sizes (150 e 220 mm).
- Round and square version.
- Composed by body, black silkscreened tempered glass flush with the floor, recessing box.
- Body in die-cast EN AB44100 aluminium, silicone gaskets; provided with feeding cable H05RN-F, with 20cm for EGO vetro 150, 30cm for EGO vetro 220. Remote electronic ballast.
- Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
- Glass surface temperature lower than 40°C.
- Recessing box for laying in reinforced polymer, can be ordered separately.
- Fixed optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
- AISI 316 stainless steel screws.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- Insulation class III.
- ENEC approved.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

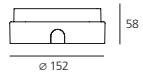

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- 5 sizes (55, 90, 150, 220, 320 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable (H05RN-F 2x1 for versions 55 and 90, H05RN-F 3x1 for version 150, H07RN-F 3x1 for versions 220 and 320), resin-bonded inside the body.
- Electronic ballast integrated in the body; for versions 90 and 55: 24V power supply and remote ballast supplied separately.
- Frame in aluminium or stainless steel.
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, suitable for cables with a diameter from 5 to 13.5 mm.
- Adjustable optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Versions 150, 220 and 320: circuit operation is assured also in case of damage to one or several LEDs.
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- ENEC approved.
- Versions 55 and 90: insulation class III.
- Versions 150, 220 and 320: insulation class I.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

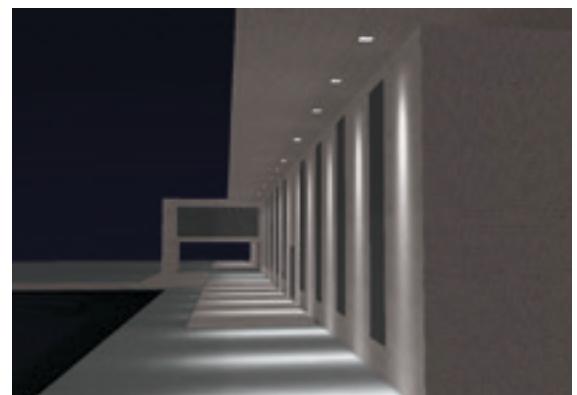

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

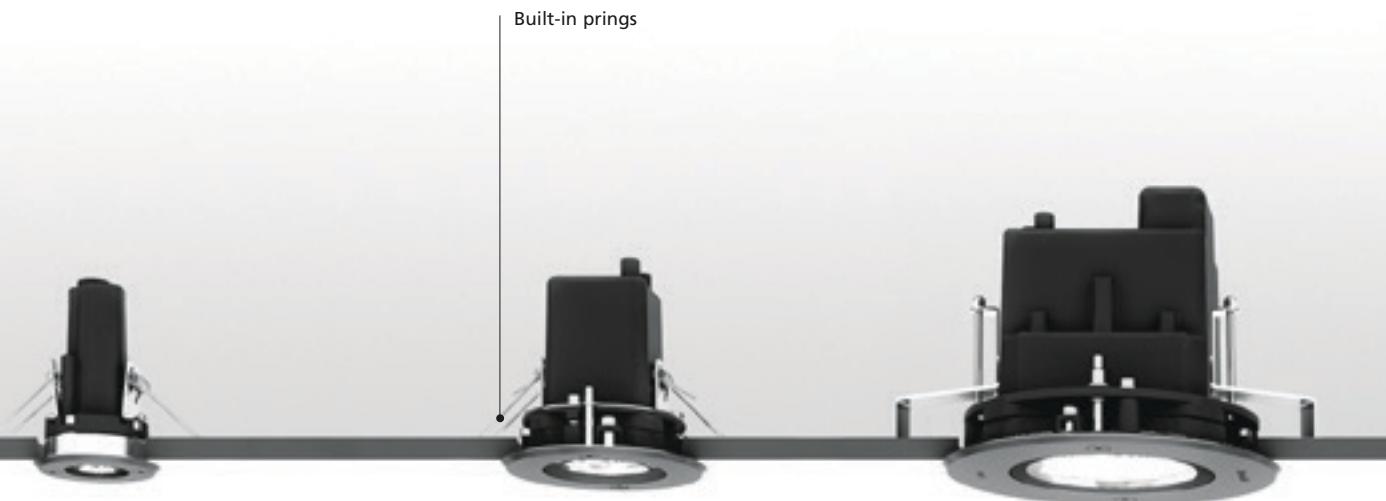

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

Orcamo 320
downlight
Round

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- 3 sizes (150, 220, 320 mm).
- Round and square version.
- Composed by body and black silkscreened tempered glass.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable (H05RN-F 3x1 for version 150, H07RN-F 3x1 for versions 220 and 320), resin-bonded inside the body.
- Electronic ballast integrated in the body.
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, suitable for cables with a diameter from 5 to 13.5 mm.
- Adjustable optics.
PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:

Warm = 3000K
Neutral = 4000K
Cold = 6000K

- Circuit operation is assured also in case of damage to one or several LEDs.
- Ceiling mounting plate to be ordered separately.
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- ENEC approved.
- Insulation class I.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

T409916 Plate for plasterboard

FLAT

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- Low recessed depth.
- 4 sizes (55, 90, 150, 220 mm).
- Round and square version.
- Composed by body, frame, black silkscreened tempered glass.
- Body in EN AB44100 aluminium, silicone gaskets; provided with 50cm-long pre-resined two-pole connection cable H05RN-F. Remote electronic ballast.
- Frame in aluminium or stainless steel.
- Springs in Harmonic Steel for fixing to plasterboard ceilings.
- Electrical connection to the mains by means of ballast.

- Fixed optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- AISI 316 stainless steel screws.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- Insulation class III.
- ENEC approved.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Remote ballast
supplied separately.

Lighting unit
with built-in springs.

Round or square frame in aluminium
or stainless steel.
Silkscreened tempered glass.

Spot optic

Concentrated luminous flow to highlight
details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting
large areas.

Wall Washer optic

Elliptical distribution of the luminous
flow suitable for wall washer effect.

FLAT

- Downlight fixture with high-performance LED light sources.
- Recessed suspended ceiling installation.
- 2 sizes (150 e 220 mm).
- Round and square version.
- Composed by body, black silkscreened tempered glass.
- Springs in Harmonic Steel for fixing to plasterboard ceilings.
- Body in die-cast EN AB44100 aluminium, silicone gaskets; provided with 50cm-long pre-resined three-pole connection cable H05RN-F.
- Remote electronic ballast.
- Fixed optics. PMMA lenses in 3 different versions of beams.

- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- AISI 316 stainless steel screws.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- Insulation class III.
- ENEC approved.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood optic

Wide luminous flow suitable for lighting large areas.

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

Megara

design
Michele De Lucchi
2011

- Light fixture with high-performance LED light sources.
- Drive-over recessed floor installation with floor-protruding cap. All the versions are drive-over up to 5000Kg. Due to the low height of the cap, Megara 90 is also suitable for installation in walk-over areas, being careful to avoid areas of direct transit (near walls, buildings, etc.)
- 3 sizes (90, 150, 220 mm).
- Composed by body, cap, diffuser, recessing box.
- Body and cap in painted EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable (H07RN-F for versions 90 and 150, H05RN-F for version 220).
- Electronic ballast integrated in the body.
- Diffuser in UV resistant polycarbonate.
- Power connection to the mains by means of the IP67 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to 13.3 mm.
- Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
- Recessing box for laying in reinforced polymer to be ordered separately.
- Radial emission beam optic.
- 1, 2, 4 beam and full configurations.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.
- IP Rating IP65-IP67.
- ENEC approved.
- Insulation class I.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

T409903 Recessing box

Series of wall built-in fixtures, with frame or wall flush glass, in three sizes.

Mechanical solutions

The minimum recess depth (75mm including the recessing box) allows installation even in walls with minimum depth.

High level of shock resistance (IK10).

The use of nylon reinforced with fibre glass for the body ensures high mechanical sturdiness and optimum resistance to corrosion.

The cromed zamak frame is resistant to saline attack.

Optical performances

The reflector in optic aluminium with high coefficient of reflection has been designed to ensure the maximum light efficiency avoiding any dazzle.

Floor lighting starts a few centimetres from the wall where the fixture is installed. There are no shadows or light breaks.

Installation and maintenance

Easy assembly with two anti-vandal screws for the version with frame and with spring for the glass flush version.

Minimum maintenance with smooth surfaces and without internal recesses.

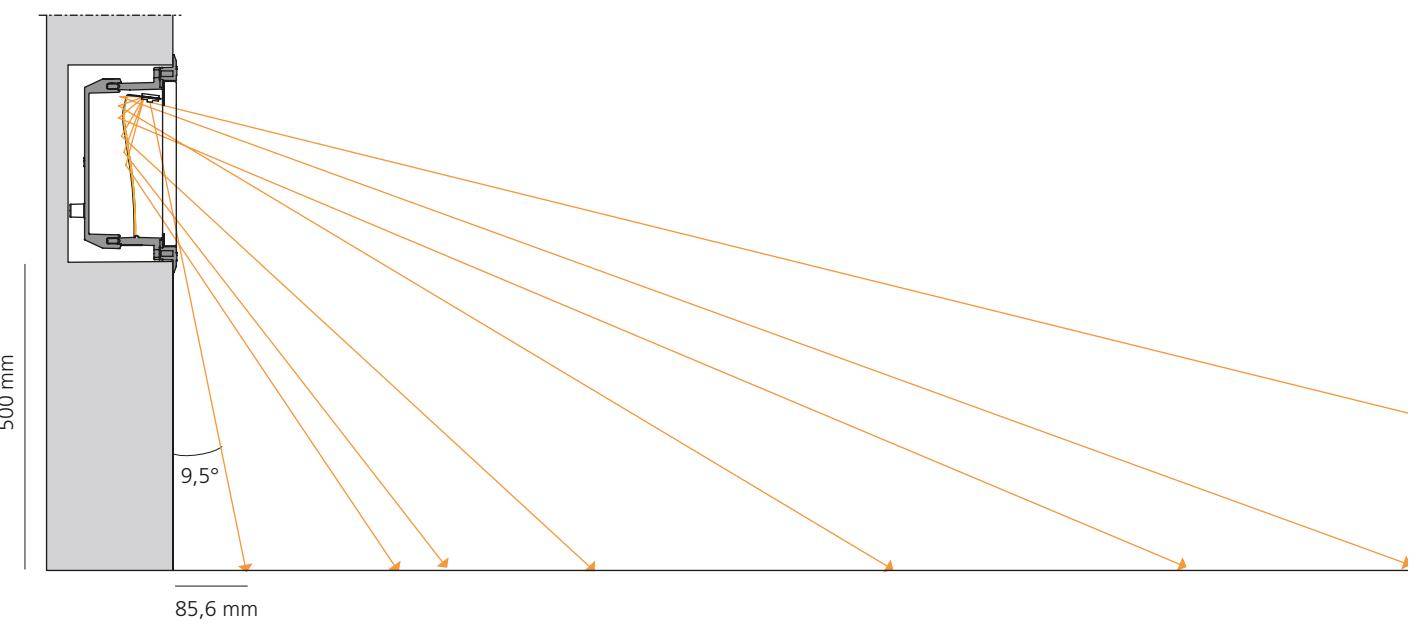

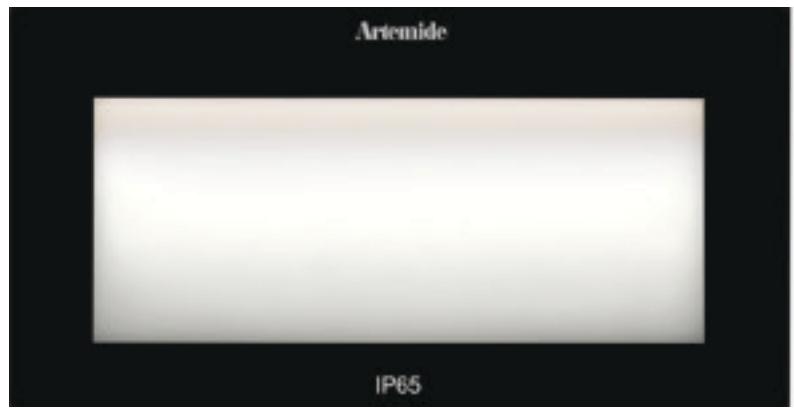

Recessed hole

Recessing box in
reinforced polymer

Body in nylon
reinforced with fibre
glass

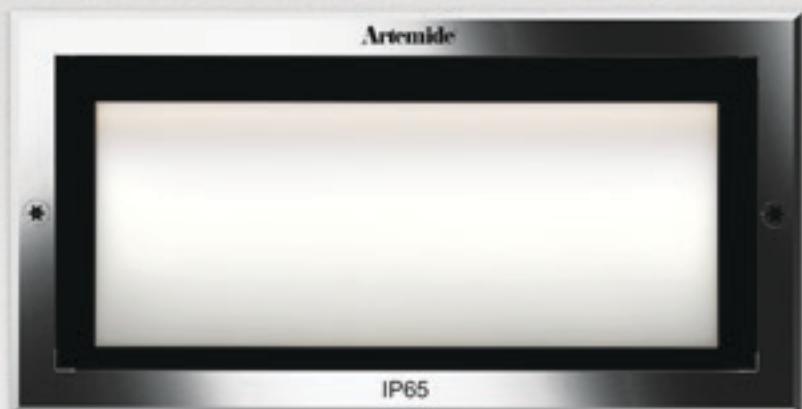

Reflector in optic
aluminium with high
coefficient of
reflection + strip LED

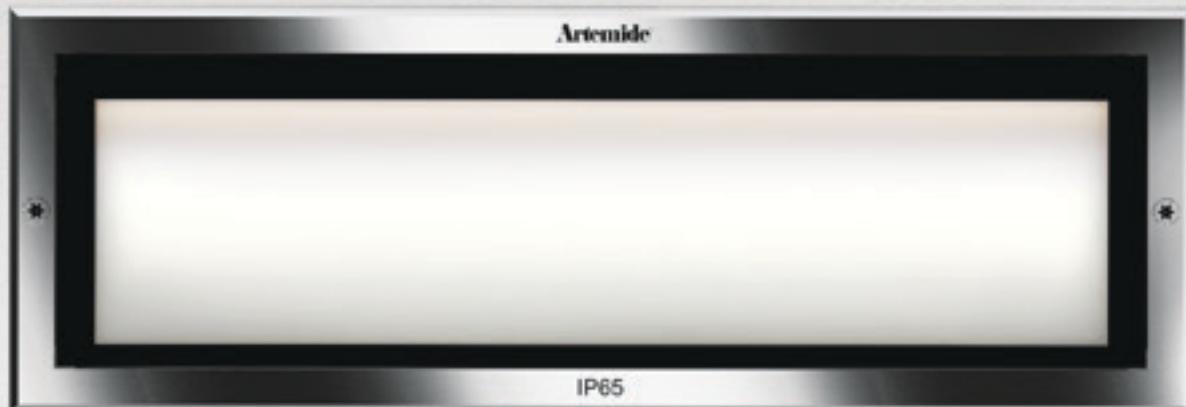

Tempered glass and
cromed zamak frame

Faci

design
Ernesto Gismondi
2012

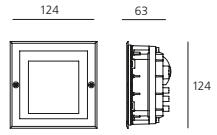

- Light fixture with high-performance LED light sources.
- Recessed wall installation.
- 3 sizes (120, 240 and 360mm length).
- Composed by lamp body and recessing box.
- Body in high-resistance reinforced polymer. The lamp body is snap-fitted into the recessing box, then it is fixed by means of two anti-vandal screws Torx. This product is suitable for areas at risk of vandalism.
- Aluminium reflector conveying and diffusing the light flow downwards ensuring an even floor lighting and visual comfort without glare.
- Diffuser in 8mm-thick silkscreened tempered glass ensuring higher vandal-proof resistance.
- Front frame in chromed zamac.
- Recessing box for laying in reinforced polymer, with low depth, can be ordered separately.
- Wiring inside the lamp body with IP65 grommet suitable for cables with a diameter of 8-12mm for the connection to the mains.
- AISI 316 setscrews and silicone seal gaskets.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Light fixture with high-performance LED light sources.
- Recessed wall installation.
- 3 sizes (120, 240 and 360mm length).
- Composed by lamp body and recessing box.
- Body in high-resistance reinforced polymer. The lamp body is snap-fitted into the recessing box, so the final product has no visible screws and the glass is flush with the wall.
- Aluminium reflector conveying and diffusing the light flow downwards ensuring an even floor lighting and visual comfort without glare.
- Diffuser in 6mm-thick silkscreened tempered glass.
- Recessing box for laying in reinforced polymer, with low depth, can be ordered separately.

- Wiring inside the lamp body with IP65 grommet suitable for cables with a diameter of 8-12mm for the connection to the mains.
- AISI 316 setscrews and silicone seal gaskets.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Light fixture with high-performance LED light sources.
- Walk-over and drive-over recessed floor installation.
- Walk over and drive over approved up to 5000Kg.
- Monochromatic or RGB light.
- Composed of body, diffuser, recessing box, closing end caps, junctions.
- Body in extruded EN AW6060 T5 aluminum.
- Opal non-slippery tempered glass 8mm-thick.
- Glass surface temperature lower than 35°.
- Profile end caps in injection-mould polycarbonate with silicone gasket.
- Recessing box for laying in stainless steel AISI 304.
- Recessing box end caps and junction in stainless steel AISI 304.
- Electrical connection to the ballast by means of a two-pole cable H05RN-F, with IP68 quick-release terminal block which is supplied with the fixture and can be housed in the recessing box.
- 24Vdc remote ballast.
- Body fastened to the recessing box by means of proper pre-stressed steel springs supplied with the fixture.
- Painted profile with 2-stage outdoor treatment: primer, outdoor paint.
- White monochromatic LEDs available in 2 colour temperatures:
Warm = 3000K
Neutral = 4000K
- RGB version with Full Colour RGB LEDs.
- IP Rating IP67.
- Insulation class III.
- Technical features of light fixtures in compliance with EN60598-1.
- Installation must be carried out by specialized personnel.
- Carefully follow the instructions.

- Installation must be carried out by specialized personnel.
- Carefully follow the instructions.

LineaLed Wallwasher adjustable

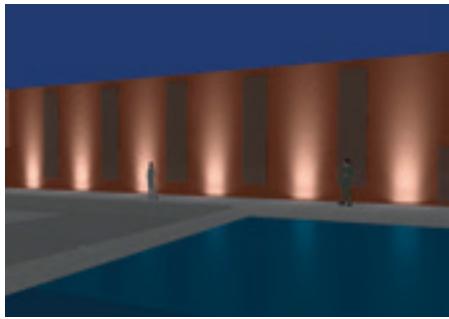

- Light fixture with high-performance LED light sources.
- Wall or ceiling installation.
- Composed by body in extruded aluminium, protection glass, adjustable brackets.
- Body in extruded EN AW6060 T5 aluminium.
- Transparent, non-slip tempered glass 8mm-thick.
- Glass surface temperature lower than 50°.
- Adjustment brackets in die-cast aluminium.
- Electrical connection to the ballast by means of two-pole cable H05RN-F, with IP68 terminal board supplied with the fixture.
- Polycarbonate end caps with silicone gasket.
- 24Vdc remote ballast.
- Painted profile and brackets with 2-stage outdoor treatment: primer, outdoor paint.
- Optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 2 colour temperatures:
Warm = 3000K
Neutral = 4000K
- IP Rating IP65.
- Insulation class III.
- Technical features of light fixtures in compliance with EN60598-1.
- Installation must be carried out by specialized personnel.
- Carefully follow the instructions.

PWM driver for fixtures with autonomous colour programs for stand-alone or controlled working by means of DMX 512 protocol for installations of all sizes.

NL19030	DSC 30 USB interfaced DMX stand alone
----------------	---------------------------------------

Digital interface provided with software. If connected to the PC USB port, it transforms the program instructions into DMX 512 control signals.
DSC30 (512 DMX controllable channels, real-time clock, local use) allows computer-interactive programming and stand-alone mode, that is the possibility of autonomous interface repetition without PC connection.

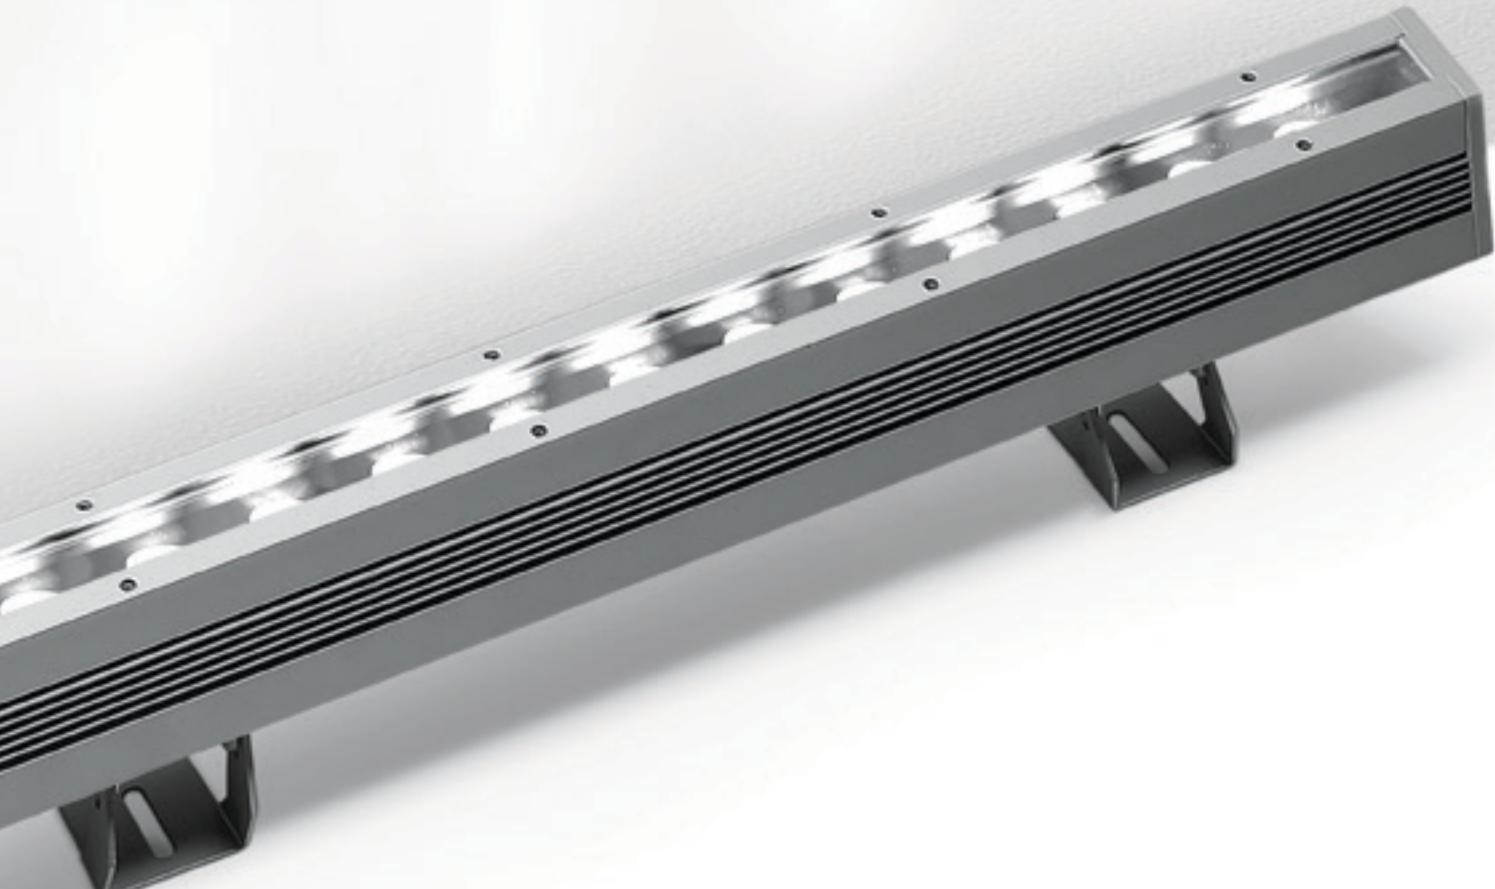

Connecting diagram
see pag. 274

NL50035	Antidazzle screen	780mm
----------------	-------------------	-------

- Light fixture with high-performance LED light sources.
- Wall or ceiling mounting.
- Composed by body, diffuser and adjustable brackets.
- Body in extruded EN AW6060 T5 aluminium.
- Diffuser in 8mm-thick UV resistant transparent polycarbonate.
- Adjustable bracket in painted aluminium.
- End caps in injection mould of aluminium.
- 24Vdc remote ballast.
- Electrical connection to the ballast by means of a H07RN-F cable, with IP68 terminal board supplied with the fixture.
- Painted profile with 2-stage outdoor treatment: primer, outdoor paint.
- Optics. PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 2 colour temperatures:

- Warm = 3000K
- Neutral = 4000K
- RGB version with red, green and blue monochromatic LEDs.
- IP Rating IP65.
- Insulation class III.
- Technical features of light fixtures in compliance with EN60598-1.
- Installation must be carried out by specialized personnel.
- Carefully follow the instructions.

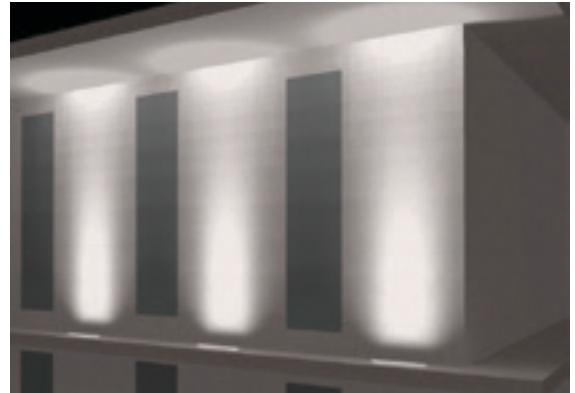

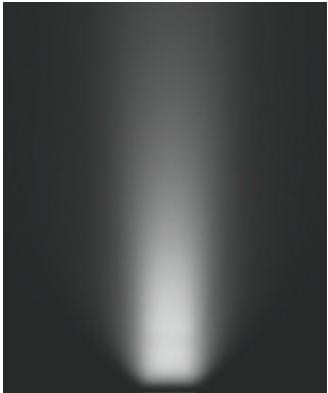

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

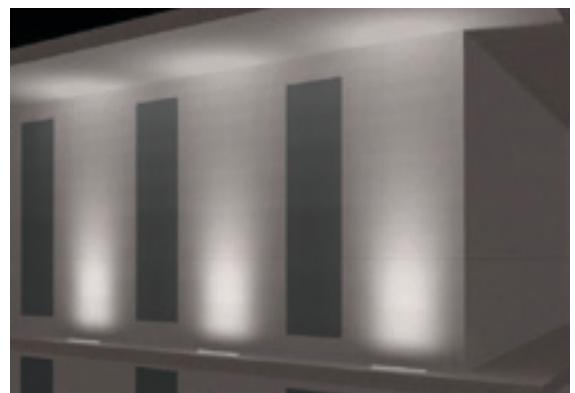

10° optic

Medium optic

Medium luminous flux to highlight details, large sections of windows.

25° optic

Flood optic

Wide luminous flow suitable for lighting large areas.

Maximum n° of fixtures per LED driver.

Mechanical solutions

Maximum adjustment flexibility (rotation 360°, tilting 180°)

The silicon aluminium alloy EN AB-44100 ensures optimum resistance to corrosion.

Nano ceramic paint ensures very high resistance to corrosion.

High level of shock resistance (IK10).

Optical performances

The use of selected Leds and the accurate design of optics ensure:

- optimum control of the light beams with the use of metacrylate lenses;
- different kinds of beam opening;
- wide selection of binning;
- high flows.

Energy consumption

The highly efficient, ENEC certified ballasts allow a minimum energy consumption without waste. The use of ballasts fully complying with electromagnetic emission standards avoids radiation dispersions.

Installation

Easy wiring in the base and fixture installation with 4 dowels.

reddot design award
winner 2012

Cefiso

- Light fixture with adjustable direct emission, with high-performance LED light sources.
- Floor, wall and eaves installation.
- 2 sizes: Cefiso 14, Cefiso 20.
- Available in two finishes: grey-white painted and anthracite grey painted.
- Composed by adjustable lighting unit and terminal board. Rotation on the base +/-180°, body tilting +/-90° by means of a graduated metal ring allowing an accurate adjustment. Positioning is maintained by means of locking dowels.
- Body and terminal board in EN AB44100 aluminium, silicone gaskets. Electronic ballast integrated in the body.
- Silkscreened tempered glass siliconed flush with the body to avoid backwater.
- Wiring to be carried out inside the terminal board by piercing an IP65 grommet suitable for cables with a diameter of 8-13 mm.
- PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-5.
- IP Rating IP65.
- ENEC approved.
- Insulation class I.

Mechanical solutions

Maximum adjustment flexibility (rotation 360°, front tilting 180°, side tilting 90°). The silicon aluminium alloy EN AB-44100 ensures optimum resistance to corrosion.

Nano ceramic paint ensures very high resistance to corrosion.
High level of shock resistance (IK10).

Optical performances

The use of selected Leds and the accurate design of optics ensure:

- optimum control of the light beams with the use of metacrylate lenses;
- different kinds of beam opening;
- wide selection of binning;
- high flows.

Energy consumption

The highly efficient, ENEC certified ballasts allow a minimum energy consumption without waste. The use of ballasts fully complying with electromagnetic emission standards avoids radiation dispersions.

Installation

Easy wiring in the base and fixture installation with 4 dowels.

- Light fixture with adjustable direct emission, with high-performance LED light sources.
- Floor, wall and eaves installation.
- 2 sizes: Eculo 13 and Eculo 18.
- Available in two finishes: grey-white painted and anthracite grey painted.
- Composed by lighting unit, terminal board and fixing bracket. Rotation on the base +/-180°, side body tilt +/-45° and front body tilt +0/-90 by means of a spherical joint allowing an accurate adjustment.
- Body and terminal board in EN AB44100 aluminium, fixing bracket in stainless steel, silicone gaskets. Electronic ballast integrated in the body.
- Silkscreened tempered glass siliconed flush with the body to avoid backwater.
- IP67 connector for electric connection to the mains, it can be housed in the terminal board compartment and is suitable for cables with a diameter of 5-13.5mm.
- PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:

Warm = 3000K
Neutral = 4000K
Cold = 6000K

- Screws in AISI 316 stainless steel.
- The components in die-cast aluminium and the steel bracket are painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-5.
- IP Rating IP65.
- Insulation class I.

Falange

design
Wilmette & Industries
2011

- Adjustable light fixture with direct emission, with high-performance LED light sources.
- Ground, wall, eaves installation.
- 2 sizes: 134x134, 238x134 mm.
- Composed by adjustable lighting unit and support (housing the wiring). Rotation on the base +/-180°, body tilt +/-100° by means of a graduated metal ring allowing an accurate adjustment. Positioning is maintained by means of locking dowels.
- Body and support in EN AB44100 aluminium, silicone gaskets.
- Electronic ballast integrated in the body.
- Silkscreened tempered glass siliconed to a secondary frame.
- Wiring to be carried out by means of plug IP 68.
- PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 3 colour temperatures:
 - Warm = 3000K
 - Neutral = 4000K
 - Cold = 6000K
- AISI 316 stainless steel screws.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-5.
- IP Rating IP65-IP67.
- Insulation class I.

- Light fixture with adjustable direct emission, with high-performance LED light sources.
- Floor, wall and ceiling installation.
- 2 sizes (diameter 103mm Ego Spot 5 and 110mm Ego Spot 7).
- Composed by body, frame, glass and bracket.
- Adjustable lighting unit. Rotation on the vertical axis +/-90°. Positioning is maintained by means of locking screws.
- Body and frame in computer numerical control machined billet aluminium.
- Painted spot with 2-stage outdoor treatment: primer, outdoor paint.
- EPDM gasket.
- Connection cable HO5RN-F with standard length of 1 meter.

- Remote ballast.
- PMMA lenses in 3 different versions of beams.
- White monochromatic LEDs available in 2 colour temperatures:
Warm = 3000K
Neutral = 4000K
- Picket for ground installation in galvanized sheet iron.
- AISI 316 stainless steel screws.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-5.
- IP Rating IP65.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Medium optic

Medium luminous flux to highlight details, large sections of windows.

Wall Washer optic

Elliptical distribution of the luminous flow suitable for wall washer effect.

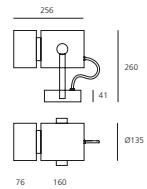

Chateau Monfort, Milan - IT Architectural Project: Arch. Federico Vedani

- Monochromatic LED projector.
- Floor, wall, ceiling, eaves installation.
- Consists of an adjustable lighting unit and terminal board. Rotation on the base +/-180°, body tilting +/-130. Positioning is maintained by means of locking dowels.
- The base and the lighting unit are connected by a H05RN-F cable.
- EN AB47100 aluminium head and terminal board, EN AW6060 aluminium body, silicone gaskets.
- Electronic ballast integrated in the body.
- Silicone-sealed silk-screened tempered glass.
- Wiring to be performed inside the terminal board by piercing an IP65 grommet suitable for 8-12mm diameter cables.
- LED COB with PMMA lens and anodized aluminium reflector in 2 different beam versions.
- Available in 3 different powers.
- All the screws used outside the product are in AISI 316 stainless steel.
- All the components in die-cast aluminium are painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.
- Technical features of the light fixtures in compliance with EN60598-1 and section 2-5.
- IP Rating IP65
- Insulation class I

Ernesto Gismondi
2013

- Light fixture with direct emission, with monochromatic LED light sources.
- Floor, wall, eaves installation.
- Consists of lighting unit, wiring terminal board and fixing plate. Rotation on the base +/-10°, body tilting +/-90. Positioning is maintained by means of locking dowels.
- EN AB47100 aluminium body and terminal board, silicone gaskets. Electronic ballast integrated in the body.
- Polycarbonate diffuser silicone-sealed to the lens supporting unit.
- Composed by 3 interchangeable optical units.
- IP67 connector for the electrical connection to the mains, which can be located in the base compartment and is suitable for 5-13.5mm diameter cables.
- LED circuits with PMMA lenses in 3 beam versions: 10°, 23° and elliptical 12x40°
- All the screws used outside the product are in AISI 316 stainless steel.
- All the components in die-cast aluminium are painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.
- Technical features of the lighting fixtures in compliance with EN60598-1 and section 2-5.
- IP Rating IP66.
- Protection level from 4KV impulse overvoltage.
- Insulation class II.

Metamorfosi kit outdoor LED

2000/2013

- Light fixture kit with LED sources.
- Floor or wall installation.
- Dark green finish.
- The kit is composed by 3 cylinders containing 3 projectors with red, green and blue dichroic filters, which allow a wide range of light coloured atmospheres to be created.
A fourth cylinder contains the distribution board and the receiver.
- Kit Metamorfosi is available in stand alone version or synchronized version: in this case, the basic lamp body can be provided with up to 99 additional fixtures that can be controlled by the same master fixture.
- It is possible, using a remote control, to select standard atmospheres and to adjust the light intensity.
- Lamp unit in extruded aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- A support bracket allows floor or wall mounting and the adjustment of projectors.
- Reflector in anodized aluminium.
- Transparent moulded tempered glass + coloured dichroic filters.
- Stainless steel fixing screws and silicone seal gaskets.
- Suitable for watertight connection.
- Technical features of the light fixture in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class I.

- Several Metamorfosi kits can be connected at a certain distance from one another, so that they project the same colour tonalities or they alternate the same atmospheres simultaneously.
- For the operation in synchronized mode, the following elements are necessary: a Master fixture, equipped with receiver and remote control. It is possible to add up to 99 "Slave" fixtures to the Master fixture, with synchronized operation by means of a signal cable. The master control unit must be placed so that the remote control signals can reach it.
- In order to prevent problems due to electromagnetic interference, the signal cables must not be put in conduits together with other electrical wires.

Remote control operation

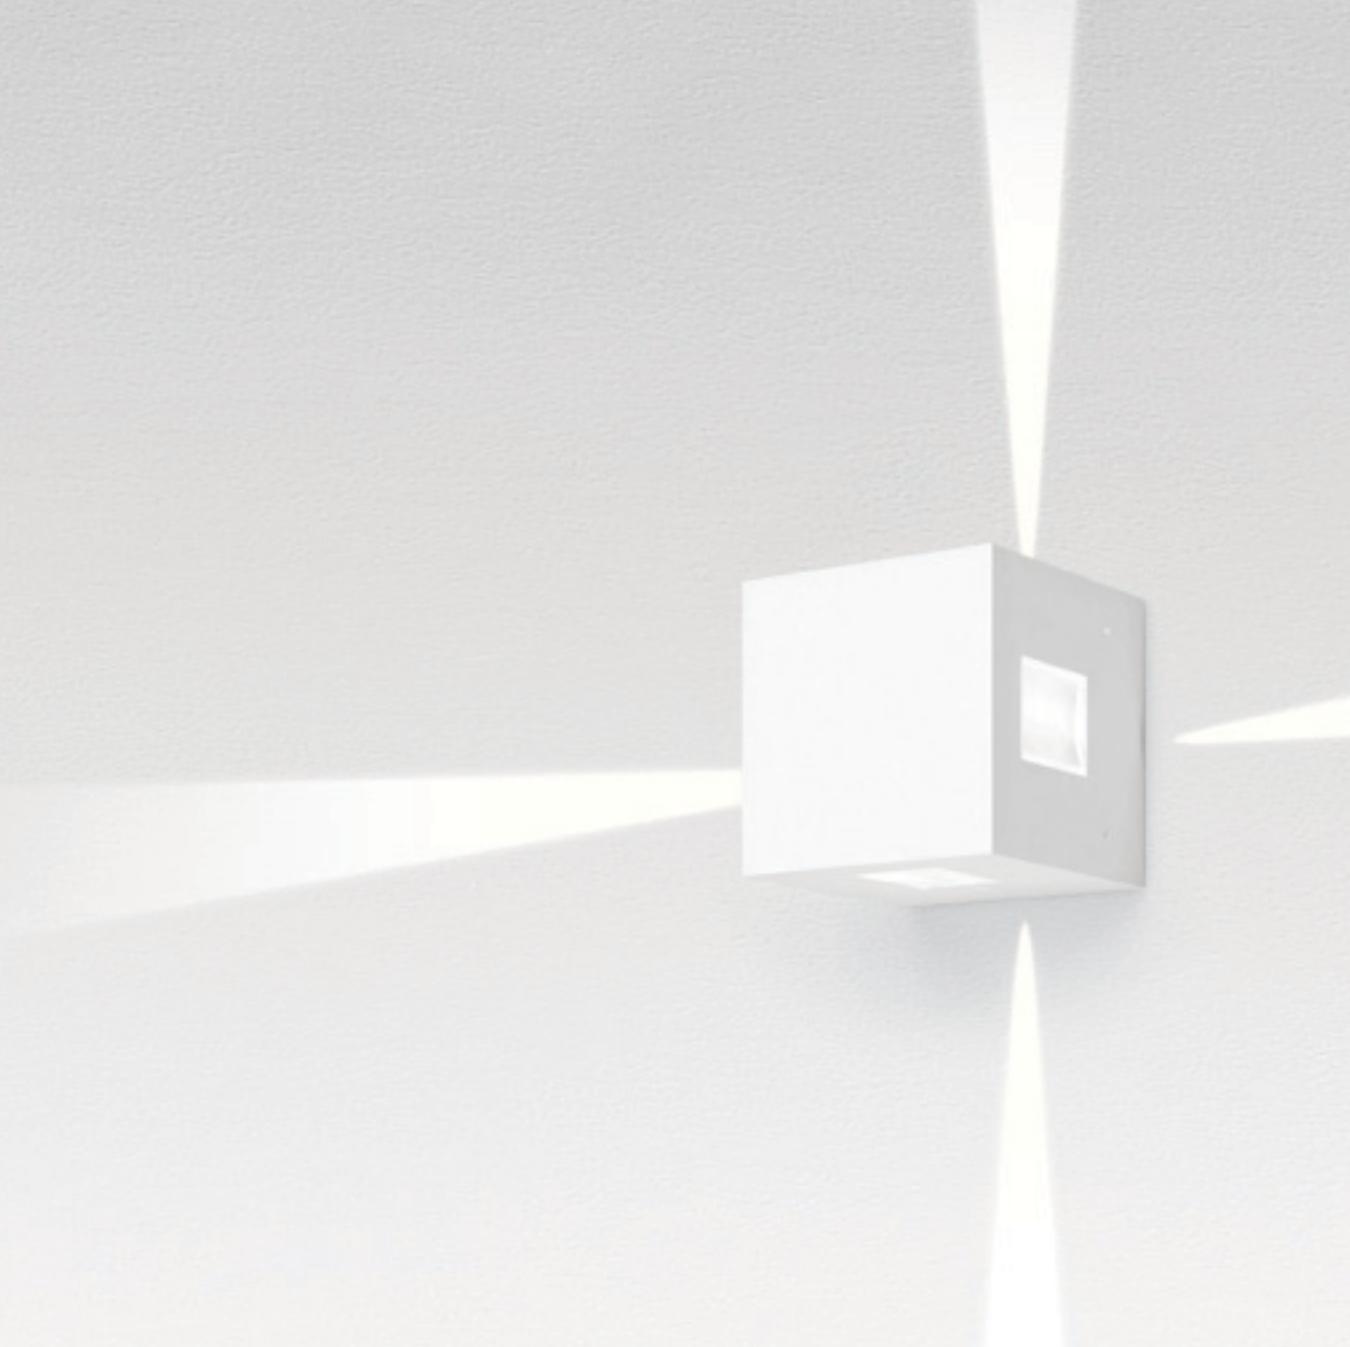

By pressing the black key on the remote control, 3 programmes can be selected: by pressing it briefly (<1sec) the following programmes are selected in sequence: rainbow programme, warm colours only, cold colours only. By holding the key pressed (>1 sec), it is possible to switch the system on or off and the last set programme is memorized even without network. Moreover, each colour can be separately adjusted by means of the coloured key on the remote control (red-green-blue): by pressing it briefly (< 1 sec) colour on-off is enabled; by holding it pressed (> 1 sec) colour can be adjusted up to the minimum and maximum level.

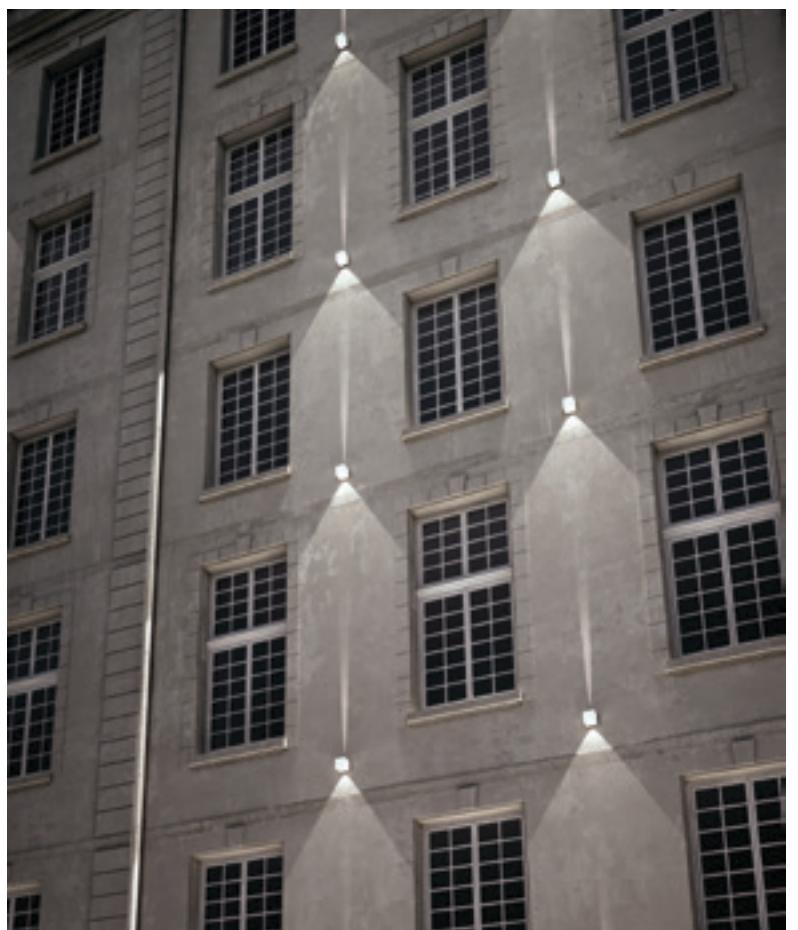

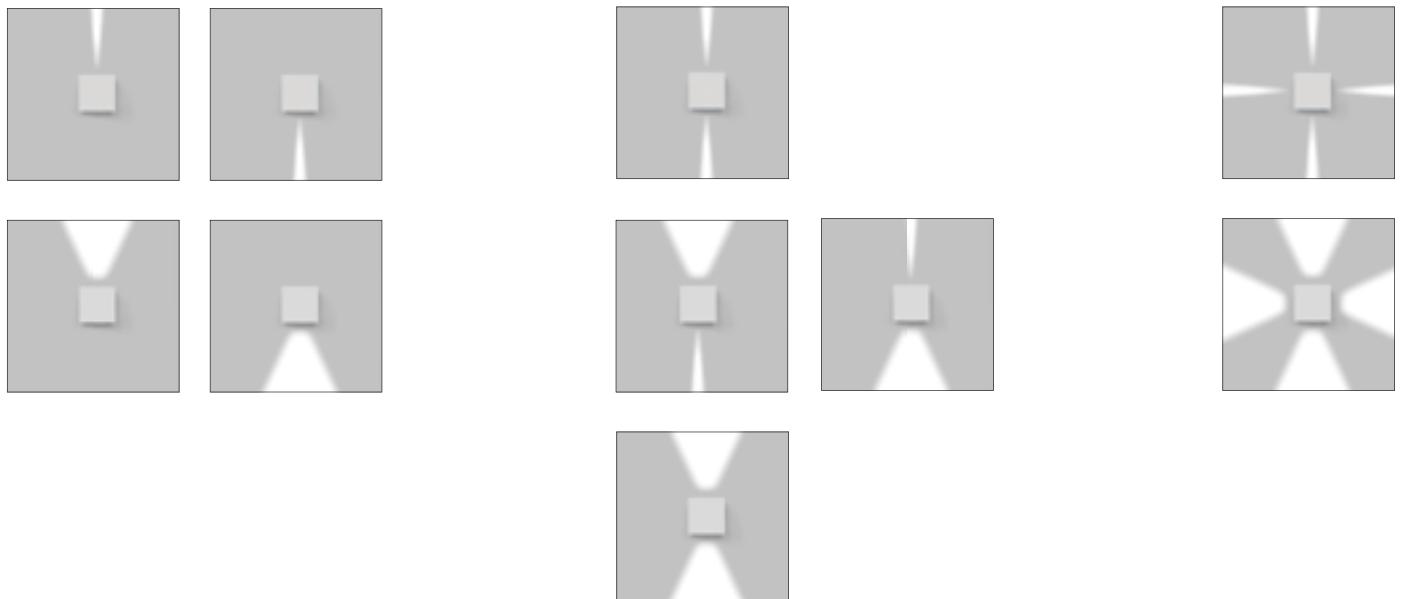

Effetto

2011

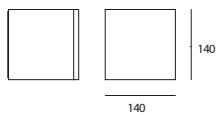

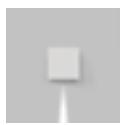

- 
- Light fixture with 1, 2 or 4 light beams using monochromatic LED light sources together with light-diffusing lenses which optimize the optical performance of the beams and establish their width. Designed to create geometric lights of scenic effect, it is available with beams of the same spread or with combined beams.
 - Beam spread 15° and 90°.
 - Wall installation.
 - Available in two shapes: square and round and in two finishes: grey-white painted and rust painted.
 - Composed by lighting cap unit and terminal board fixed together by means of locking dowels.
 - Cap in die-cast EN AB-47100 aluminium.
 - Terminal board in reinforced polymer.
 - Watertight gasket in silicone rubber.
 - Electronic ballast integrated in the fixture.
 - PMMA lenses siliconed flush with the cap to obtain two different beam angle opening (narrow and wide).
 - White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
 - Wiring to be carried out inside the terminal board by piercing an IP65 membrane grommet suitable for cables with a diameter of 6-13 mm.
 - Locking dowels used outside the fixture in AISI 316 stainless steel.
 - Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
 - Technical features of light fixtures in compliance with EN60598-1.
 - IP Rating IP65.
 - ENEC approved.
 - Insulation class II.

220/240Vac 50/60Hz electronic ballast included

- Light fixture with 2 combined light beams: the large one with lighting function and the narrow one with decorative function.
- Wall installation. The fixture can be installed with the main beam pointed either downwards or upwards according to the kind of lighting desired (direct or indirect).
- The large beam is obtained by the combination of a monochromatic LED light source with a reflector. The narrow beam is obtained by the combination of a monochromatic LED light source with a high-performance projector.
- Available in two finishes: light grey painted and anthracite grey painted.
- Composed by lighting cap unit and terminal board fixed together by means of locking screws.
- Cap and terminal board in die-cast EN AB-47100 aluminium.
- Watertight gasket in silicone rubber.
- Electronic ballast integrated in the fixture.
- Projector composed by a body in reinforced polymer and PMMA lenses.
- Tempered and silkscreened light-diffusing glasses, siliconed flush with the lighting cap.
- Power connection to the mains to be carried out outside the fixture, without need of opening it, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.
- Wall fixing by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.
- Locking screws used outside the fixture in AISI 316 stainless steel.
- Die-cast aluminium and bracket painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

220/240Vac 50/60Hz electronic ballast included

Calumet

design
Ernesto Gismondi
2012

- Lighting system with single or double emission, with high-performance LED light sources combined with lenses which optimize the light emitting efficiency of the beams and determine their spread.
- Available in two sizes: ø 8 e ø 13 cm.
- Ceiling and wall installation.
- Available in two finishes: light grey and painted anthracite grey painted.

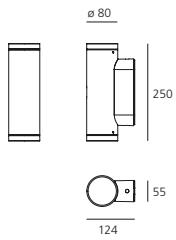

Calumet wall

- Single or double emission version.
- Made up of lighting body, lighting cap and wall fixing bracket.
- Cylindrical body in EN AW-6060 aluminium containing the electronic power supply components.
- Optical lighting body in EN AW-6060 aluminium.
- Led and collimator lenses which swing by means of an aluminium bracket.
- Diffuser in toughened glass.
- Wall fixing bracket in bent steel.
- Water tight silicone gaskets.
- Electronic ballast integrated in the body.
- PMMA lenses with narrow beam (8,5° and 19°)
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6500K
- IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- All fixing dowels used outside the fixture are in AISI 304 stainless steel.
- The components in die-cast aluminium and the steel bracket for wall fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class II.

Calumet ceiling

- Made up of cylindrical body, lighting cap and ceiling fixing flange.
- Cylindrical body in EN AW-6060 aluminium containing the electronic power supply components.
- Optical lighting body in EN AW-6060 aluminium
- Led and collimator lenses which swing by means of an aluminium bracket.
- Diffuser in toughened glass
- Water tight silicone gaskets.
- EN AW-6060 aluminium flange to fix the light fixture to the ceiling.
- Electronic ballast integrated in the body.
- PMMA lenses with narrow beam (8° and 32°)
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6500K
- IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- All fixing dowels used outside the fixture are in AISI 304 stainless steel.
- The components in die-cast aluminium and the steel bracket for wall fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class II.

220/240Vac 50/60Hz electronic ballast included

- Light fixture with direct side emission, with high-performance LED light sources. Six monochromatic LEDs are used together with six collimators and a light-diffusing prismatic screen to obtain an optimum lighting beam.
- Floor or wall installation. In the wall installation, the light can be pointed either upwards or downwards.
- Available in two finishes: light grey painted and rust painted.
- Composed by lighting cap and terminal board fixed together by means of locking screws.
- Cap and terminal board in die-cast EN AB-47100 aluminium, gaskets in silicone rubber. Electronic ballast integrated in the fixture.
- PMMA collimators installed on the LED light sources.
- Light-diffusing prismatic screen in PMMA siliconed flush with the lighting cap.
- Power connection to the mains to be carried out outside the fixture, without need of opening it, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.
- Wall installation by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.
- Screws in AISI 316 stainless steel.
- All the components in die-cast aluminium and the steel bracket for wall or floor fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

220/240Vac 50/60Hz electronic ballast included

$\alpha = 32^\circ$

The elliptical light emission and the flat shape of the fixture make it particularly suitable for floors or spacious areas in gardens to provide a side lighting.

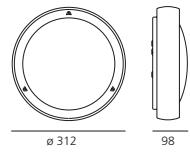

- Light fixture with diffuse emission, with LED sources.
- Wall and ceiling installation.
- LED version available with microwaves movement detector adjustable from 2 to 10 m and from 10 to 30 minutes, and with daylight sensor adjustable from 10 to 500 lux.
- Lamp unit in AISI316 stainless steel.
- Moulded covering frame in AISI316 stainless steel, satiny or polished finish.
- Available with two types of diffusers:
- Moulded prismatic diffuser in sodium-calcium glass with internal satin finish;
- Moulded prismatic shock resistant diffuser in opal UV-stabilized thermoplastic material.
- AISI 316 stainless steel screws and polyurethane seal gaskets.
- Suitable for watertight connection.
- Electronic ballast.
- IP Rating IP65.
- ENEC approved.
- Insulation class I.

220/240Vac 50/60Hz electronic ballast included

- Series of light fixtures with diffuse emission, with LED sources.
- Wall and ceiling installation.
- 3 sizes (190, 300 e 390mm).
- Available in two finishes:
silver grey painted and black painted.
- Available with two types of diffusers:
 - Honeycomb moulded diffuser in internally sanded sodium-calcium glass;
 - Honeycomb moulded prismatic shock resistant diffuser in opal polycarbonate.
- Pantarei 190 can be provided with half-light screen.
- Pantarei 300 LED available with microwaves movement detector adjustable from 2 to 10 m and from 10 to 30 minutes, and with daylight sensor adjustable from 10 to 500 lux.
- Lamp unit in die-cast EN-AB 46100 aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gaskets.
- Suitable for watertight connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved:
- Insulation class I.

Chilone

design
Ernesto Gismondi
2009

- Series of light fixtures with direct emission, with high-performance LED light sources.
- Floor, pole or wall installation.
- Available in two finishes: light grey painted and rust painted.

Chilone wall

- It can be installed with the light pointed either downwards or upwards.
- Composed by lamp, lamp support and wall support.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Lamp support in extruded EN-AW-6060 aluminium.
- Wall support in steel.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.
- Wall support included

Chilone pole

- Height 250 cm
- Composed by lamp, lamp support and ground fixing pole.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Lamp support in extruded EN-AW-6060 aluminium.
- Ground fixing pole in painted extruded EN-AW-6060 aluminium. It must be installed by means of a proper foundation plinth.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

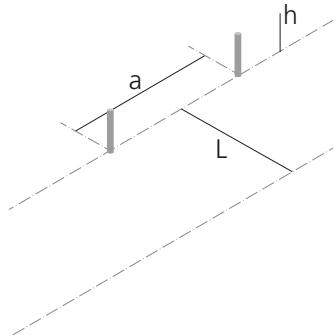

Chilone floor

- Available with downward emission in two heights (h4 5cm and h 90cm) and with upward emission (Chilone Up).
- Composed by lamp, support pole and ground mounting plate.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Support pole in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Ciclope

design
Alessandro Pedretti
(Studio Rota & Partners)
2009

- Lighting system with diffuse unilateral or bilateral emission, with high-performance LED light sources.
- Light emission is obtained by the combination of six monochromatic LED light sources, a reflector and an opaline diffuser.
- Floor, wall or recessed installation.
- Available in two finishes: light grey painted and rust painted.

Ciclope floor

- Available in unilateral and bilateral emission version and in two heights (h 50cm and h 90cm).
- Stem in extruded EN AW-6060 aluminium.
- Lighting unit composed by:
 - frame in reinforced polymer;
 - diffuser in light-diffusing polycarbonate;
 - plate in pickled, machined and galvanized steel;
 - watertight gasket in silicone rubber;
 - LED circuit;
 - electronic ballast;
 - riflettore in alluminio tornito in lastra e verniciato
 - PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- The lighting unit houses the electrical components and sources.
- Aesthetic cover in die-cast EN AB-47100 aluminium.
- Ground mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.
- The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.
- The components in die-cast, extruded aluminium and steel are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Ciclope recessed

- Lighting unit composed by:
 - frame in reinforced polymer;
 - diffuser in light-diffusing polycarbonate;
 - plate in pickled, machined and galvanized steel;
 - watertight gasket in silicone rubber;
 - LED circuit;
 - electronic ballast;
 - riflettore in alluminio tornito in lastra e verniciato
 - PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 8.5 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- The lighting unit houses the electrical components and sources.
- Aesthetic cover in die-cast EN AB-47100 aluminium painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Recessing box in reinforced polymer, can be ordered separately.
- The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

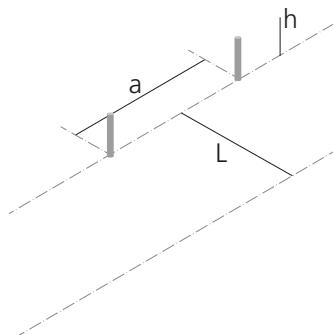

Ciclope wall

- Box in extruded EN AW-6060 aluminium.
- Lighting unit composed by:
 - frame in reinforced polymer;
 - diffuser in light-diffusing polycarbonate;
 - plate in pickled, machined and galvanized steel;
 - watertight gasket in silicone rubber;
 - LED circuit;
 - electronic ballast;
 - reflector in painted spun aluminium;
 - PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 8.5 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- The lighting unit houses the electrical components and sources.
- Aesthetic cover in die-cast EN AB-47100 aluminium.
- The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.
- The components in die-cast, extruded aluminium and steel are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

2010

- Series of light fixtures with direct unilateral or bilateral emission, with high-performance LED light sources.
- Floor and recessed installation.
- Available in two finishes: grey-white painted and rust painted.

Nuda floor

- Available in unilateral and bilateral emission version and in two heights (h 50cm and h 100cm).
- Composed by lamp, support pole and ground mounting plate.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Specular reflector in aluminium. It conveys and diffuses the luminous flow downwards ensuring visual comfort.
- Support pole in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Nuda recessed

- Composed by lamp and recessing box for recessed wall installation.
- Lamp unit in painted die-cast EN-AB 44100 aluminium, complete with holding plate for electrical components.
- Specular reflector in aluminium. It conveys and diffuses the luminous flow downwards ensuring visual comfort.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Aesthetic cover in painted aluminium.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector suitable for H07RN-F cables with a diameter from 5 to 13.5 mm for the mains connection.
- Recessing box in reinforced polymer, can be ordered separately.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Tetragono

design
Ernesto Gismondi
2013

- Light fixtures with high-performance monochromatic LED light sources.
- Floor and wall installation.

Tetragono floor

- Consists of lamp and supporting pole.
- Lamp support in extruded EN-AW-6060 aluminium, subjected to chromate treatment and painted, height 900mm, with painted steel base flange, with holes for floor installation by means of log bolts or dowels.
- Lighting unit in die-cast EN-AB 47100 aluminium painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.
- Provided with metalized polycarbonate reflectors.
- UV resistant diffuser in shock resistant polycarbonate with bright finish.
- AISI 316 fixing screws and silicone gaskets.
- Provided with cable and IP67 connector for the connection to the mains suitable for 5-13.5mm diameter cables.
- IP Rating IP65.
- Insulation class I.
- Technical features in compliance with EN60598-1.

Tetragono wall

- Light fixture with radial light emission.
- Consists of body and wall fixing plate.
- Lamp support in extruded EN-AW-6060 aluminium, subjected to chromate treatment and painted, height 50 mm, with painted steel base flange, with holes for wall installation.
- Lighting unit in die-cast EN-AB 47100 aluminium painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.
- Provided with metalized polycarbonate reflectors.
- UV resistant diffuser in shock resistant polycarbonate with bright finish.
- AISI 316 fixing screws and silicone gaskets.
- Provided with cable and IP67 connector for the connection to the mains suitable for 5-13.5mm diameter cables.
- IP Rating IP65.
- Insulation class I.
- Technical features in compliance with EN60598-1.

- Light fixture with direct emission, with high-performance monochromatic LED light sources.
- Floor installation.
- Grey-white RAL9002 finish.
- Composed by support with lamp compartment, lamp and accessory compartment.
- Lamp unit in die-cast EN-AB 47100 aluminium, painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- UV resistant diffuser in transparent shock resistant polycarbonate.
- Painted trapezoidal lamp support in vibrated concrete, with galvanized reinforcing ring for fixing to the base.
- Accessory compartment in polymers with closure cover in AISI 316.
- Hot galvanized steel mounting plate, with holes for ground fixing by means of log bolts or dowels.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

220/240Vac 50/60Hz electronic ballast included

IP65  F  03

- Floor light fixture with diffuse emission, with monochromatic LED light sources.
- Available with IP20 protection degree for indoors, IP67 and IP68 for outdoors.
- Light is diffused through 7 PMMA rods with different heights to give the impression of a groove of reeds and which can be screwed to the base by means of AISI 316 stainless steel bushes. Part of the light is also diffused on the floor around the base.
- The base has an irregular shape, which has been designed to allow a «mosaic» connection with other light fixtures so as to create an elaborate composition as needed.
- IP67 and IP68 versions are available in Single or Triple shape.

Reeds IP20

- Consists of a base made up of a transparent polycarbonate casing
- Installed between 2 aluminium plates and anti-scratch support feet.
- Technopolymer aesthetic cover.
- Complete with integrated ballast and plug with transparent cable. Switching on and off are performed by means of the pedal push button located on the cable.
- Technical features in compliance with EN60598-1
- Insulation class II.

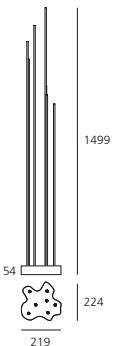

Reeds IP67

- Consists of a base made up of a transparent polycarbonate casing installed between 2 AISI316 stainless steel plates fixed by means of AISI316 stainless steel screws. Water sealing is assured by a silicone gasket. The light fixture can be fastened to the floor by means of the holes in the lower plate. Technopolymer aesthetic cover.
- Complete with integrated ballast and supplied with a 1.5 m-long H05RN-F 2x1 cable provided with IP67 connector for the electrical connection to the mains suitable for 5-13.5mm diameter cables.
- Technical features in compliance with EN60598-1
- Insulation class II.

Reeds IP68

- Consists of a base made up of a transparent polycarbonate casing installed between 2 AISI316 stainless steel plates fixed by means of AISI316 stainless steel screws. Water sealing is assured by a silicone gasket. The light fixture can be fastened to the floor by means of the holes in the lower plate. Technopolymer aesthetic cover.
- The light fixture is supplied with 24V DC power and is provided with a 5 m-long H05RN-F 2x1 cable with IP68 connector for the electrical connection to the mains suitable for 5-13.5mm diameter cables.
- Technical features in compliance with EN60598-1 and section 2-18.
- Insulation class III.

Granito

design
Ernesto Gismondi
2010

- Light fixture with metal halide sources.
- The four light beams projected through the fissures on the sides make it particularly suitable for lighting drives or creating light effects in parks and gardens.
- Available in two heights (h 30cm and h 60cm).
- Lamp unit in Cor-ten (weathering steel).
- Transparent sodium-calcium bulb protection glass.
- Ground mounting plate in steel with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gaskets.
- Electronic ballast.
- Suitable for watertight connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

● rust Cor-ten

IP65

The colour of Cor-ten steel may change in time depending on weather conditions. Before stabilization, Cor-ten steel may release rust powder that may stain the surface where it is placed.

Artemide recommends not to position it on sensitive surfaces, such as clear stones, marbles, etc.

- Light fixture with direct emission, with a unique high-performance monochromatic COB LED.
- Floor installation.
- Available in two heights (h 45cm and h 90cm).
- Composed by support with lamp compartment, lamp and ballast compartment.
- Cylindrical lamp support in engineering polymer (compact polyurethane), with co-molded galvanized steel reinforcing elements. Painted with polyurethane resistant to atmospheric and chemical agents.
- Fixture head in die-cast EN-AB 47100 aluminium, painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- UV resistant diffuser in transparent shock resistant polycarbonate.
- Accessory compartment in polymers with closure cover in AISI 316.
- Hot galvanized steel mounting plate, with holes for ground fixing by means of lag bolts or dowels.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class II.

- Series of light fixtures with direct emission, with high-performance LED light sources.
- Floor, pole and wall installation.
- Grey-white finish.

Hila wall

- Composed by lamp and wall support.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish, provided with high-efficiency light-diffusing lenses.
- Wall support in painted steel.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Hila floor

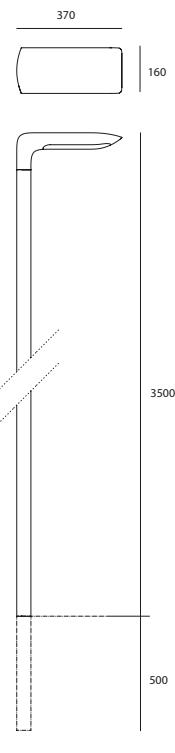

- Composed by lamp, support pole and ground mounting plate.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish, provided with high-efficiency light-diffusing lenses.
- Support pole h=90cm in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Mounting plate in painted steel, with holes for ground fixing by means of log bolts or dowels.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

Hila pole

- Composed by lamp and ground support pole.
- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satin finish, provided with high-efficiency light-diffusing lenses.
- Support pole h=350cm above-ground + 50cm underground in extruded EN-AW-6060 aluminium, chromate treated and painted.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class II.

- Grey-white painted finish.
- Composed by lighting unit and wall support.
- Lighting unit in painted die-cast EN-AB 47100 aluminium.
- High-performance asymmetrical optics in metalized polycarbonate.
- Screens in shock resistant, high transparent tempered glass.
- Wall support in painted steel.
- Painting is obtained with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gaskets.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class I.

Provoca pole

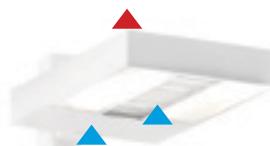

- Head-pole fixture composed by lighting unit and pole connection.
- 50x50mm square pole installation with 40x120mm square shank (not supplied).
- Lighting unit in painted die-cast EN-AB 47100 aluminium.
- High-performance asymmetrical optics in metalized polycarbonate.
- Screens in shock resistant, high transparent tempered glass.
- Head-pole fitting in painted steel.
- Painting is obtained with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gaskets.
- Technical features of light fixtures in compliance with EN60598-1.
- IP Rating IP65.
- ENEC approved.
- Insulation class I.

The LED circuits are directly anchored to the aluminium casing of the body in order to maximize heat dissipation. Moreover, some dissipation fins have been included in the product design so as to increase the heat exchange surface with external air.

The grid in the central part of the product allows natural air circulation, which cools the dissipation surface.

Due to a natural convective motion, cold air removes heat from the dissipation grid, it heats up and goes upwards, through the lighting unit, getting new fresh air from the lower part.

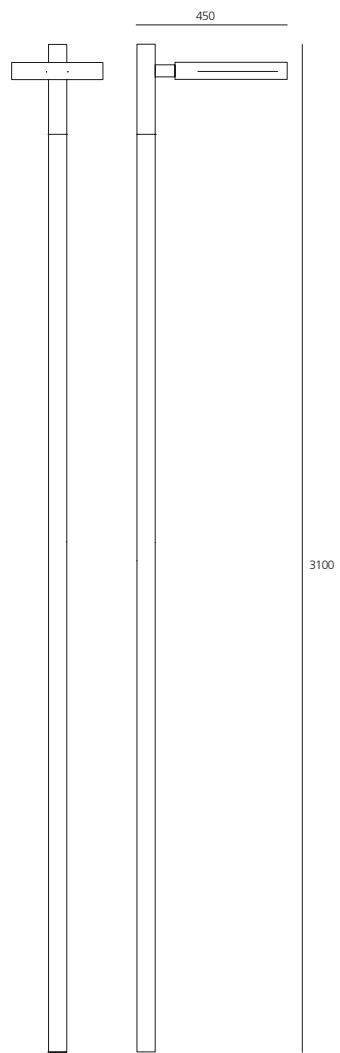

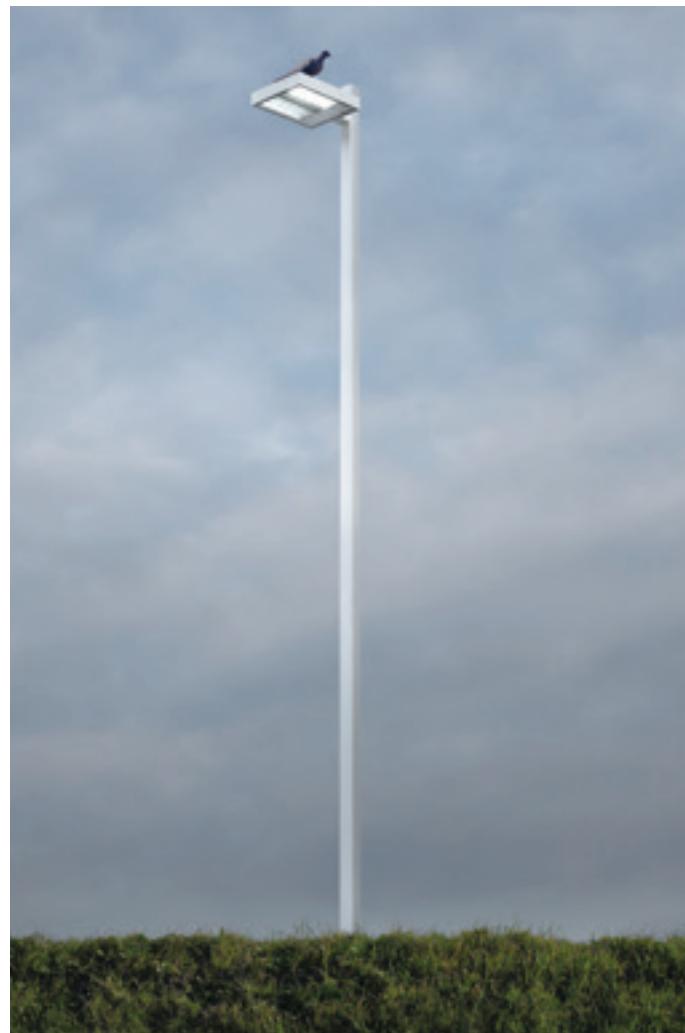

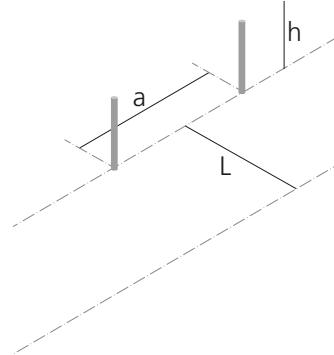

In this way LEDs are maintained at a lower temperature and their life time and light efficiency increase.

Cefiso Palo

design
Alessandro Pedretti
(Studio Rota & Partners)

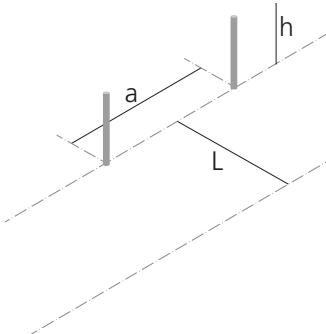

- Light fixture with adjustable direct emission, with high-performance LED light sources.
- Pole installation.
- Available in two finishes: light grey painted and anthracite grey painted.
- Composed by lighting unit and pole support. Fixing is maintained by means of locking dowels.
- The pole, not supplied, must have a ø 60mm and h90mm shank for the correct fixing of the head-pole. The pole height must be 4m from the ground to provide a correct surface lighting. At these conditions, the poles can be installed at a distance of 15m, suitable for lighting a 4m carriageway in compliance with S3 class for cycle tracks.
- Body in EN AB44100 aluminium, pole support in galvanized iron, silicone gaskets. Electronic ballast integrated in the body.
- The light fixture is protected from impulse overvoltage up to 4KV both in differential and common mode.
- Silicone-sealed silk-screened tempered glass.
- IP67 connector for electric connection to the mains, it can be housed in the pole compartment and is suitable for cables with a diameter of 5-13.5mm.
- LED circuits with PMMA lenses with road emission beam.
- White monochromatic LEDs available in 3 colour temperatures:
Warm = 3000K
Neutral = 4000K
Cold = 6000K
- Screws in AISI 316 stainless steel.
- All parts in die-cast aluminium and galvanized iron are painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-5.
- IP Rating IP65.
- Insulation class II.

Solar Tree

design

Ross Lovegrove
2007

Solar Tree is a light fixture combining an innovative design with the technical performances of LED lighting systems using solar energy supplied from photovoltaic system.

This project aims to combine the reduced environmental impact, especially deriving from the low absorption of fossil fuel-based energy, with the need of ensuring constant working and expected light performances. The operation of this light fixture is not influenced by weather randomness and project changes due to winter periods (e.g. number of panels, accumulator dimensioning). These project changes concerning dimensions and weights would imply higher costs, and however the fixture would not ensure continuous working. In fact hybrid versions are being more and more used in leading sectors. In this direction Artemide has developed the Solar Tree project which, with a mixed configuration of accumulators/solar energy and mains power supply, can combine Energy-saving and functionality at the best.

- Structure composed by curved steel poles of different diameters and heights, with a maximum total height of about 5,5m over road level.
- This system is composed by 10 "stems of grass" with 40mm Ø. On their extremity there is 1 LED of about 1 W protected by a diffuser screen in PETG and 10 poles with 76mm Ø supporting the heads.
The poles are painted with outdoor epoxy paint in light green colour shading into white.
- The 10 heads, housing the photovoltaic cells in their upper part, are supported by poles with a diameter of 76mm; 20 power LEDs, which can be supplied with power up to 500mA and have a white neutral colour temperature, are housed in the lower part of 4 of them, on an aluminium dissipator, and are provided with a screen in plastic material which ensures protection against water and dusts.
- The base is made of hot-galvanized steel plate to be fixed to the ground. Otherwise it is possible to use a base, always in galvanized steel, with reinforced concrete parts forming a circular bench. In this case the base can rest on the ground without need of further fixing systems.
- The connection/wiring parts, the control and recharge boards and the batteries are contained in several watertight boxes, provided with male and female connectors with IP Rating IP65 or higher, placed at the foot of the base or inside the concrete bench, according to the technical specifications of the Solar Tree version supplied.
- Benches in white painted concrete, with second coat of anti-graffiti paint.

Configuration

The light fitting configuration includes an analysis of the potential incoming energy (geographical location of the light fitting) and a detailed analysis of the physical location of the light fitting (proximity of buildings or trees). Lastly, an analysis of the level of requested service and performance will be implemented (luminance levels, operation hours, potential discontinuity in the service, if any).

Technical data

- Total number of heads with solar panels: 10
- Number of heads with LEDs: 4
- Installed power for each light head: about 23.1 W at 350mA (base current drive), max current drive 500mA.
- 20 power LEDs for each head in neutral light tonality 4300K.
- Maximum luminous flux for each head: minimum 1250 Lm.
- Solar panel voltage in open circuit: about 10 V.
- Peak power for each panel: about 63 W.
- Total number of "stems": 10.
- LED power for each "stem": about 1 W with a power supply of 350mA.
- 2 Batteries
- Battery voltage: 12 V
- Single battery capacity: 240 Ah
- Box with USB connection for diagnostics/ setting/servicing access.
- Technical features of the light fixture in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class II.

$$E_{in} = \sum P_{peak\ power} \cdot h_{equivalent} \cdot \eta_{system} \cdot \eta_{noct} \cdot \eta_{tilt\ angle}$$

$P_{peak\ power}$ = Maximum power input

$h_{equivalen}$ = Average received solar radiation in hours

η_{system} = System conversion efficiency

η_{noct} = Nominal operating temperature

$\eta_{tilt\ angl}$ = Exposure factor

Working

Solar Tree has been designed to work in HYBRID configuration. The batteries can ensure an autonomous working at full charge for a period of 7-10 days (with an "Energy-saving" working cycle which is described below). Moreover, in case of discharged batteries, the fixture is connected to the mains, which supplies it with energy (by means of a suitable DC ballast connected to the mains). In this way it can ensure a continuous working even with persistent bad weather and/or reduced insulation or 100% use of the light performances or, anyway, in case of negative energy balance.

LED light sources light up in the twilight (recognized according to the hours of dawn and sunset which have been set in the management program or according to other modes) and they remain lit up until dawn according to the working duty-cycle set. In case of "HYBRID" fixtures, the system uses the energy coming from the batteries until they reach the minimum charge limit, then the system is connected to the mains automatically.

In case of light fixtures with this configuration, if the connection to the mains takes place at the same time when the public lighting, which the Solar tree fixtures refer to, lights up, it is possible to set them so as that the moment of the mains connection is recognized as start for the Solar tree working, and vice-versa in case of mains cut-off.

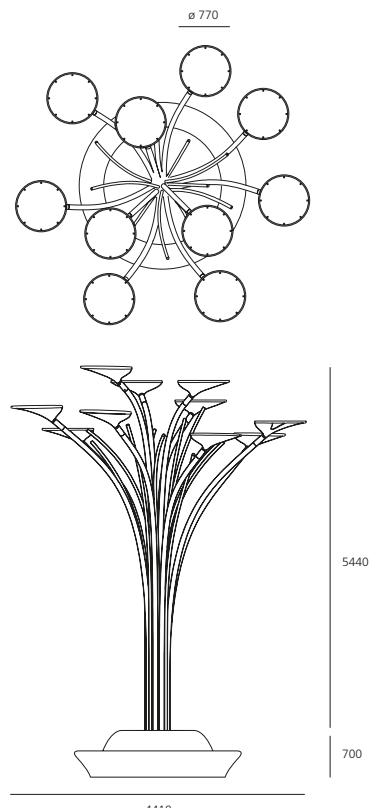

4 photovoltaic cells with 20 LEDs each

10 "stems" 1 LED each

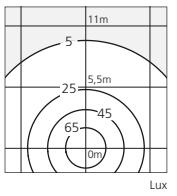

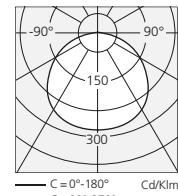

6 photovoltaic cells + dissipators

Solar Tree

	Code	LED	Power	Flux	CCT
Solar Tree		4 heads LED + 10 stems LED 1W	23W (92W Tot.) (10W Tot.)	1250lm (5000lm Tot.)	4300K 6000K
IP55	T080600	Lighting units, curved poles, "stems" and batteries			
	T080400	Pole support structure + 18 benches			

Light intensity of one head.
Flow 1250 lm

Lighting of the whole fixture.

Working programs

Two working modes can be selected according to the needs: Manual and Automatic. Automatic mode can be set with three different configurations according to the performance and level of energy-saving desired for the light fixture. In particular:

Auto Eco

100% working in the hours when the installation areas are expected to be used more often, reduced working of the only LED heads during the hours of full night (the LED light sources are switched on and adjusted at about 25% of their working rating from sunset to dawn in order to ensure a mean floor lighting of 8 lux). This mode is recommended to obtain a continuous working even during autumn/winter and to maintain energy balance.

Auto 100%

Working mode to ensure the complete management of the fixture by considering its performances with respect to a higher input of solar energy (if this condition occurs).

Personalizzato

The user can establish the hours and the working configuration of the fixture according to his needs. The three above-mentioned configurations can be associated to a particular period and they can alternate one another, if desired.

Manual

Can be enabled by the user in case of particular events and/or needs. The user can access the advanced adjustment menu for a 0-100% slicing of the flow emitted by the single LED heads and by the "stem" units. In this way the sources remain lit up and adjusted according to the configuration set by the user until switching off or return to automatic mode controlled by the user.

Legenda

Classifications

Class I

The safety of the luminaire is guaranteed by an additional protective conductor (earth) connected with the metal frame of the lamp.

Class II

The safety of the luminaire is guaranteed by the double reinforced insulation of conductive parts, and without earth connection.

Class III

The luminaire is fitted with a protection device against electrical shock that features a very low voltage power supply and prevents it from generating higher voltages.

Note: a Class III luminaire does not have to be equipped with an earth protection.

Luminaire suitable for installation on normally inflammable surfaces.

Approvals

ENEC Certification of European Conformity.

IMQ Italian Institute of Quality Mark.

IP Ingress Protection rating

IP65

Electrical fittings are preset in order to prevent the intrusion and contact with solids and liquids with live parts. Resistance against the penetration of solids and liquids is expressed by the initials IP, followed by two digits that stand for the degree of protection: the first referring to solids, the second to liquids.

First digit

0 Non-protected.

- 1 Protected against the penetration of solid objects greater than 50 mm.
- 2 Protected against the penetration of solid objects greater than 12 mm.
- 3 Protected against the penetration of solid objects greater than 2,5 mm.
- 4 Protected against the penetration of solid objects greater than 1 mm.
- 5 Dust-protected.
- 6 Dust-tight.

Second digit

0 Non-protected.

- 1 Protected against dripping water.
- 2 Protected against dripping water when tilted up to 15°.
- 3 Protected against spraying water.
- 4 Protected against splashing water.
- 5 Protected against water jets.
- 6 Protected against heavy seas.
- 7 Protected against the effects of immersion.
- 8 Protected against submersion.

Photobiological risk group

R1 No photobiological hazard under normal behavioural limitations.

R2 Does not pose a hazard due to aversion response to bright light or thermal discomfort.

IK shock-resistance degree

IK10

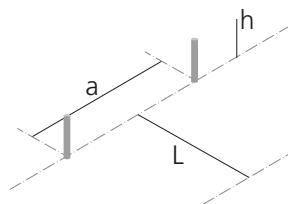

The light fixture is placed on a horizontal stable surface. A body of a certain shape and weight is dropped repeatedly from a certain height according to the IK degree to be tested.

IK Degree	Impact Energy (J)	Equivalent impact
00	Unprotected	-
01	0,15	Fall of a 200g body from 40cm of height
02	0,2	Fall of a 200g body from 40cm of height
03	0,35	Fall of a 200g body from 40cm of height
04	0,5	Fall of a 200g body from 40cm of height
05	0,7	Fall of a 200g body from 40cm of height

Photometric curve in polar coordinates

It represents the light intensity distribution (in candles/1000 lumen) emitted by the light fixture on the planes passing through its optical axis. Two curves are indicated for each light fixture. The first one refers to the transversal C0-C180 plane (continuous line) and the second one to the longitudinal C90-C270 plane (broken line). The photometric curve defines the lighting engineering features of the fixture, such as the luminous flux control, the type of emission, the maximum intensity direction, which are needed for testing illuminance values during use. Photometric curves shown in this catalogue are only indicative. For accurate photometric data, calculations should be taken from Dialux programme.

Lighting application

Summary of illuminance levels according to the design parameters.
h= source height
a= width of the light fixture positioning interval
L= illuminance distance

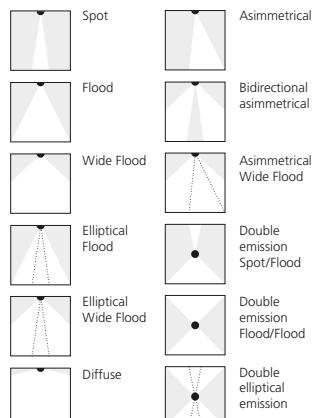

Isolux diagram

It shows the illuminance distribution on the vertical plane (wall washer fixtures) or on the horizontal plane (floor fixtures and poles). The Isolux lines link the points of equal illuminance.

Light cone

It shows the maximum illuminance level in lux, measured in horizontal parts at different heights with respect to the fixture. ϕ_{C0} and ϕ_{C90} represent the lengths of the section axes. In case of rotating symmetric emissions, the two values coincide. The emission angle shows the flat angle subtended by the directions where light intensity is equal to the 50% of the maximum intensity.

Light emissions

Symbols

- Walk-over light fixture
- Drive-over light fixture
- Light fixture with RGB colour mixing system.
